

## FireKeeper

**Client:** Morsø

**Product:** FireKeeper

### FireKeeper

The name for this product has been chosen due to its American Indian origins. The idea of invigorating a fire by blowing directly into the embers through a tube can be traced back to Indian people before Columbus.

A simple and effective device for making and tending a fire - in woodburning stoves, open fire-places and outdoor grills.

The device is used as a fire blower, but also functions as a poker and scraping device.
