### SignArt

The SignArt toilet is part of a wide range of bathroom porcelain and -furniture, designed by Knud Holscher. One of the main innovations is the flush-function Fresh Flush, a system, which helps to avoid limescale formation, and rinses the toilet with each flush, spreading a nice scent: Through flipping up the flush button on top of the cistern, a deodorising stick, which is activated with each flush, can be inserted in a cabinet. The double-wall cistern reduces flushing sounds and helps to avoid condense water on the surface. The seat is shaped ergonomically. The toilet seat from Pressalit automatically closes itself in a slow mode.
