

Informal dining

Informal dining

This product was designed for every conceivable form of al fresco dining: for picnics in the forest, on the beach, in the park or on a journey in the car or even abroad a yacht.

The kit consists of a range of individual pieces that can be mixed and matched for the occasion. The individual products comprise a basket-style metal carrier, a series of plastic and porcelain serving and storing dishes with cutlery, glassware, a cooling element, a cast iron stove and more. Also available is a comprehensive textiles collection of mats and ground cushions, napkins and tablecloth, all featuring unique motifs.

All items have special features, designed with people-on-the-move and dining in mind: the plates have thumb recesses to make them easy to hold, while the cutlery is fixed to the plate, etc.

Product: Informal dining
