

## Metro Totem

### Metro information totem

The Metro totem landmark will soon become a familiar sight amongst people living in Copenhagen and the suburbs.

After winning 1st prize in the competition of Ørestadsselskabet for a Metro information totem, HID have completed the design and delivery of the first totem in collaboration with Hansen & Henneberg, Ib Andersen Industries and Ørestadsselskabet.

The cylindrical column in stainless steel acts as a skeleton on which transparent plates are attached. The totem's illuminated information adapts to daylight conditions, becoming a magically blue cylinder at night.
