

Philips

MileWide

The MileWide luminaire is part of a wide range of road accessories, which also contains traffic lights, signs and busstop shelters. It is suitable for mounting on a horizontal arm of 60 mm diameter.

Housing and bottom frame are manufactured of chill cast aluminium, which is dark anodised. The surface is centrifugal cleansed and provided a lacquer finish. This titanium-like surface is very resistant towards weather and ultraviolet radiation. The luminaire is supplied with a range of high pressure sodium lamps:SON-T 50,70,100 and 150W

The cover bowl is made from toughened flat glass, the edge is masked by serigraphy.

The housing can be opened by releasing a steel spring hidden in a slot between bottom frame and cover. This allows access for installation, lamp replacement or service.
