

Pressalit A/S

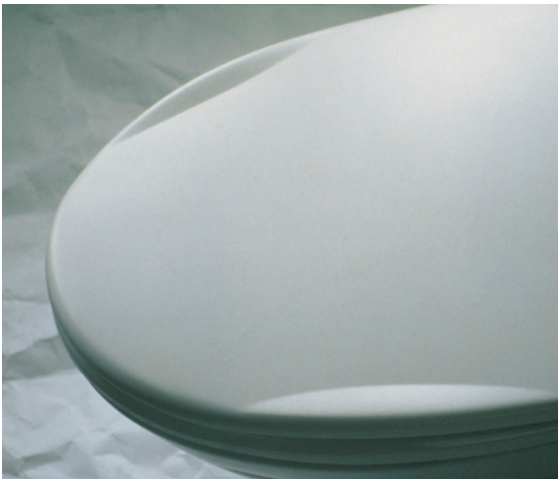

Toilet seats for Ifö Aqua and Cera

Sitting comfort, hygiene and the adaption of the design to the production methods of Pressalit were the main for the design expression of the toilet seats for Pressalit.

The seat and seat cover slightly bend up on the edge closest to the cisterne, so the space for hidden hinge details is created.

The Cera seat was designed in 1992. Its main design feature is the grip for the opening and closing of seat and seat cover. The buffers and hinges are integrated with beautiful details.

Both the Cera and the Aqua seat are part of a larger programme of Pressalit, amongst which these seats are the most sold ones, focusing on a large consumer group.

Client: Pressalit A/S
Product: Toilet seat for Ifö
Aqua and Cera
