Product: SignArt

SignArt toilet seat

Nordic. Functional. Designed by Knud Holscher who found inspiration in nature.

Living a good life is not just about having a good seat, also in the bathroom. Functions to make your everyday life easier are also important. We have built a number of functions into Sign Art – mostly incorporated in the unique hinge at the back of the seat. Soft-Close for instance. Let the seat go and it will land softly and silently on the pan. Quick-Release – press the button on either side of the seat and it is released, for easier cleaning.

This seat combines 3 obvious shapes. The saddle shape of the cover, the cylinder hinge and the horizontal surface of the handles. The handles are a natural part of the design and enhance the hygienic dimension of the seat.

Pressalit Sign Art has been designed for the Ifö ceramic line called Sign Art.
