

SeriQ Sign A/S

SeriQ sign system

Flexibility is the hallmark of SeriQ, the new sign system from SeriQ Sign. The system is composed of a series of panels, that each constitute independent modules. By virtue of this modularity, the panels may be combined in a variety of ways both horizontally, vertically and as diagonals; regardless of whether they are mounted on a wall or hung from a ceiling. In the event that a company needs to relocate, this adaptability will allow previous door signs to be re-used as free-standing desktop signs e.g..

All planes are manufactured in aluminium and have plane satin finished surfaces. In order to avoid visual discrepancies, the panels are based on concealed mounting panels and have no visible joints or screws.

A specially developed snap-lock, also invisible, prevents from unauthorized removal of the signs.
