

**SIMRAD**

**Chartplotter**

SIMRAD SHIPMATE AS is a company that develops and manufactures high-end marine electronics for yachts worldwide.

The Chartplotter is a navigational maritime instrument that employs electronic sea charts and GPS technology. Three instruments: a Chartplotter, an Echosounder and a Radar, are all integrated in a single unit.

Recognizing the need to renew this product, SIMRAD specified their requirements, while clearly stating the importance of preserving product identity with other SIMRAD product lines and the need for a new user interface. After analysing user behaviour at sea and collaborating closely with SIMRAD engineers, a new range of chartplotters with a redesigned user interface and intuitive commands were designed and launched.

**A smart solution where space is limited...**

The latest in SDGPS, Chartplotter and Echosounder technology presented on a bright, sunlight viewable 6 inch LCD screen. Your position is continuously updated on the detailed electronic chart, which can be customized to suit your requirements for range and details. We offer a Chartplotter, Echosounder or a ChartSounder with combined functions!

**The new Simrad 33 series with 6" screens - an economic solution**  
 The compact Simrad 33 series instruments are the perfect navigation and fishing solution for smaller yachts. A robust and splashproof cabinet with the cast aluminum casing and watertight connectors. Like the larger models, the Simrad 33 series is packed with professional features. Full dual station capability via a High Speed Data bus is standard.

**Now also with SDGPS...**  
 Chartplotter or ChartSounder with crystal clear 6 inch screens. TFT color displays with built in SDGPS receiver. Simrad Chartplotters display C-Map NT+ electronic charts to provide a high level of accuracy wherever you are in the world.

**Fast updating - multiple screen presentations**

**More chart coverage and overview for a lower price!**  
 The new charts are up to 4 times larger than the regular ones! C-Map NT+ cards are the most detailed and updated electronic charts in the world. They are protected in a watertight drawer in the front, offering smooth passage from one area to another.

**Fast updating - multiple screen presentations**
